ROBOTIC AND AUTOMATIC PRESSURIZED AIR-COOLED MIG GUNS WITH ENDURA CABLE™

PRESSURIZED AIR-COOLED MIG GUN FEATURES

- Cooled with shop air (1.2 -1.8 cfm) from the rear case to the shrouded nozzle.
- Replaces water-cooled or hot running standard air-cooled guns.
- 100% duty cycle with any gas.
- Quick-change keyed conductor tubes are standard.
- The patented Pac-Mig™ Mig Guns are equipped with the patent pending **Endura-Cable™** which reduces cable movement and premature wear for optimum cable management.
- Cables can be changed without removing the front case assembly from the robot arm. This allows cables to be changed without disturbing TCP. (See maintenance manual)
- Kevlar cable protectors available.
- All Pac-Mig guns can be ordered to match existing mount diameters, conductor tube angles and lengths to minimize reprogramming.
- Guns can be ordered with a wire lock or an air blast installed.
- PAC-MIG™ guns will not be destroyed to lack of, or no air flow.
- Minimal maintenance is required.
- Front end consumable life is increased by a minimum of 20%.
- Specials available on request.
